Subject: Re: 1st Phase of Gas Well Drilling at Dimock 9mi square area

Rich Hydraulic fracturing isn't termed injection under the SDWA unless they use diesel fuel. There is injection of fluid in any frac but it's limited duration and volume at this point is considered stimulation for bringing a well into production

Subject: 1st Phase of Gas Well Drilling at Dimock 9mi square area

Scott,

We are getting asked what the 1st phase of fracing includes at the gas wells at Dimock area. I left you a voice mail about this and we did get some additional information from Karen Johnson, but thought we'd get the info directly from you guys. The specific question is whether injection occurred and at which wells, etc.

Any clarification would be appreciated.

Thanks. Rich
